EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Roland Long on 12/12/08.

The application has been amended as follows:

12. A case with a partitioning member, comprising:

a case;

a cover, a periphery of the cover connected with a periphery of the case to form an interior space between the case and the cover;

a partitioning member, having a peripheral portion, positioned inside the interior space;

a first welding portion connecting the case with the cover and positioned by the peripheral portion of the partitioning member;

a second welding portion, positioned between the first welding portion and the interior space, connecting the case with the peripheral portion of the partitioning member; and

a third welding portion, between the interior space and the second welding portion, connecting the case with the peripheral portion of the partitioning member, the

third welding portion being spaced from the second welding portion to form an open pocket space between the second welding portion and the third welding portion above the peripheral portion of the partitioning member,

wherein the case is provided with a hole, open to the atmosphere, between the second welding portion and the third welding portion and connected with the pocket portion, and

wherein a surface, spanning the length of the peripheral portion and facing opposite the pocket portion, is in direct contact with a surface of the cover, and wherein the pocket portion is isolated from a fluid flow passing through the partitioning member.

14. (Cancelled)

2. The following is an examiner's statement of reasons for allowance: The closest related prior art is to Rosenberg US 3 803 810 and Bormann et al. US 5 536 413. Rosenberg teaches most of the elements of claim 5 but does not teach the pocket portion being separated from a fluid flow through the partition member. Bormann teaches a case and partition member similar to the claimed case and partition member of claims 5 and 12 but does not teach the pocket portion being separated from a fluid flow through the partition member. It would not have been obvious to one of ordinary skill in the art to modify the apparatus' of either Rosenberg or Bormann to provide this

claimed feature. The pocket portions of both Rosenberg and Bormann allow the filter apparatus to vent gas through the partition member. The claimed invention uses the claimed pocket portion and vent to determine if the welds have provided a sufficient seal with the partition member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BENJAMIN KURTZ whose telephone number is (571)272-8211. The examiner can normally be reached on Monday through Friday 8:00am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Sample can be reached on 571-272-1376. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
